

The Buggy tips back easily to self-load the bale

To engage the drive wheel simply drop it down onto the tyre

The winch is for loading bales onto the feeder (electric winch available as an option)

The Bale Buggy feeds out from the rear of the machine to minimise blockage

A Jack stand is provided as standard equipment

The ability to adjust the floor chain tension

## BALE BUGGY

**BUILT TO WORK**

## FEATURES

All Bale Buggies come with the following features as standard equipment:

- Feeds out at the rear, minimising blockages
- Handles a variation of round bales including hay, straw and baleage
- Self-loading
- 8mm high-tensile link feed chains
- Geared three times slower than ground speed – rather than leaving a continuous mat of feed, the feed is ‘teased’ out
- The bale weight is forced forward in the machine when feeding – this keeps the weight over the drawbar for traction and helps eliminate the risk of the bale falling off the back when going uphill
- Jack stand provided

### Optional equipment

- Electric winch (conversion kit also available for existing machines)

## DIMENSIONS

|                     |                                  |
|---------------------|----------------------------------|
| Bale size (maximum) | 1800mm (dia) x 1350mm (6' x 4'6) |
| Weight (unladen)    | 310kg                            |
| Height              | 1520mm                           |
| Length              | 3400mm                           |
| Width               | 2150mm                           |

In accordance with the company's policy of continuous improvement to its machines, alterations in specifications may be made without notice. The company accepts no responsibility for any discrepancies which may occur between specifications of its machines and the descriptions thereof contained in this publication.
